BRAC continued the emergency response for the host community

Overall humanitarian context and needs

Cox's Bazar has experienced a severe monsoon weather phenomenon of 'Probaho 1' since 26 July. As soon as it came to an end on 1 August, another system formed in the North Bay- 'Probaho 2' which has the potential to cause moderate-heavy to heavy rainfall in Cox's Bazar from 3 August to 8 August. On the very first day of Probaho 2, Cox's Bazar recorded **99mm** of rainfall accumulation in the last 24 hours. Cox's bazar is still recovering from last week's intense and deadly weather which has already taken its toll by affecting **46,545** people from the Rohingya camps. As per joint host community damage and need assessment - **59,731** people in Teknaf, **25,800** people in Ramu and **32,941** people in Ukhiya have been affected in the host community. WASH facilities and local road networks have been damaged, including semi-structured and mud houses in most of the affected areas. Support is needed for food, water and hygiene kits including COVID-19 safety equipment, recovery of damaged local infrastructure, cash and non-food items. In the last 24 hours, approximately **41** shelters and two WASH facilities were reported to be partially damaged or destroyed in the camps.

BRAC has been active throughout the camps and host community areas with emergency response activities. In the last 24 hours, **1,372** packets of hot meals were distributed in the camps. **154** affected families of the host community received dry food, and in total **154** tarpaulins were provided to rebuild their houses. Today, **60** shelter kits were provided to affected families in the camps. As the initial shock has subsided a little, along with providing the emergency response, BRAC team is doing repair and renovation with available resources. **60** latrines, **16** bathing cubicles, **13** deep tube wells, **13** shallow tube wells were repaired, **147,240** pieces of aquatabs for water purification and **200** jerry cans for carrying safe drinking water were distributed. BRAC will continue to provide support throughout the camps and host community areas with specific needs and supporting families to rebuild their shelters where possible.

Areas affected by the rainfall

Approximately eighteen camps and three upazilas affected

Shelter kits provided to the affected families to rebuild their damaged households

WASH Volunteers are supporting with aquatabs for safe drinking water

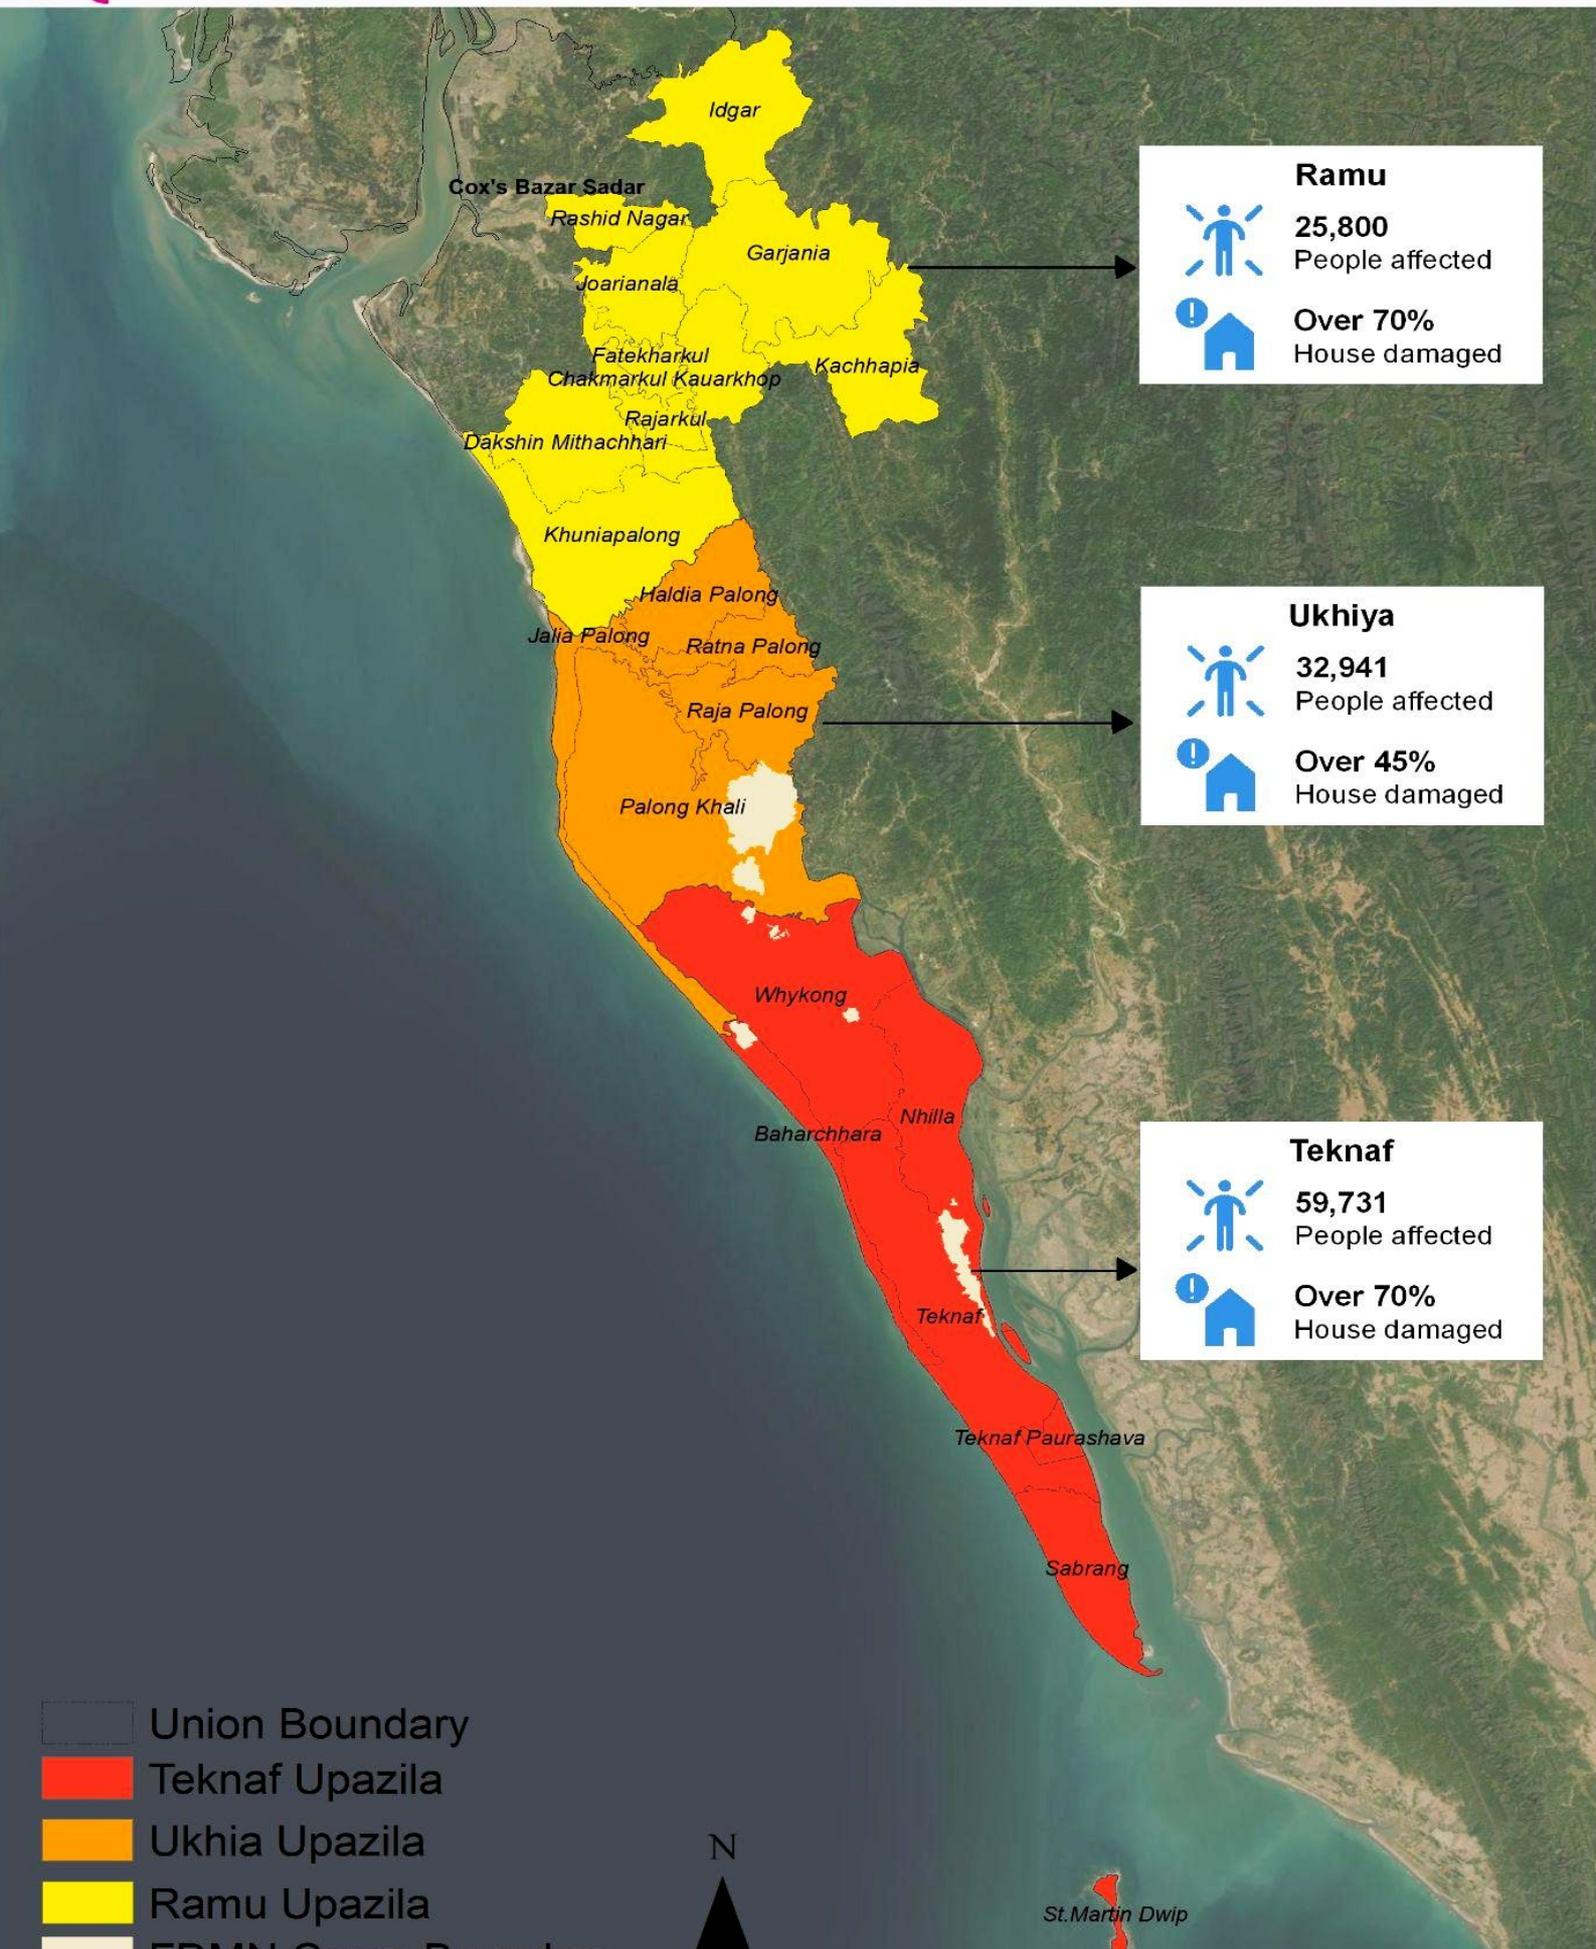

A woman from the Rohingya community is receiving hot cooked meals

Weather forecast | Cox's Bazar

3 August - 9 August 2021

This document is supported by daily weather forecast news from Bangladesh Meteorological Department.

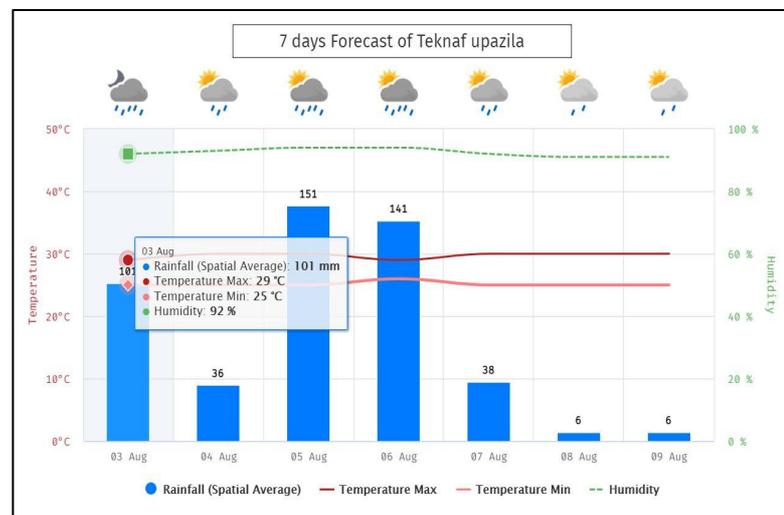

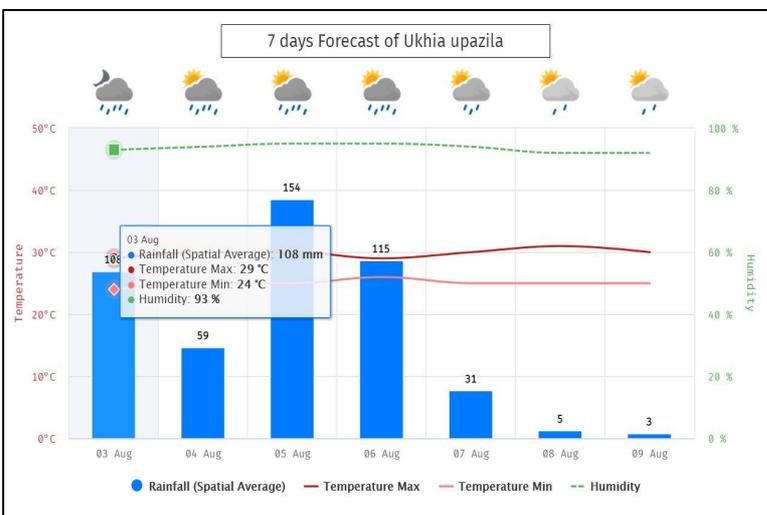

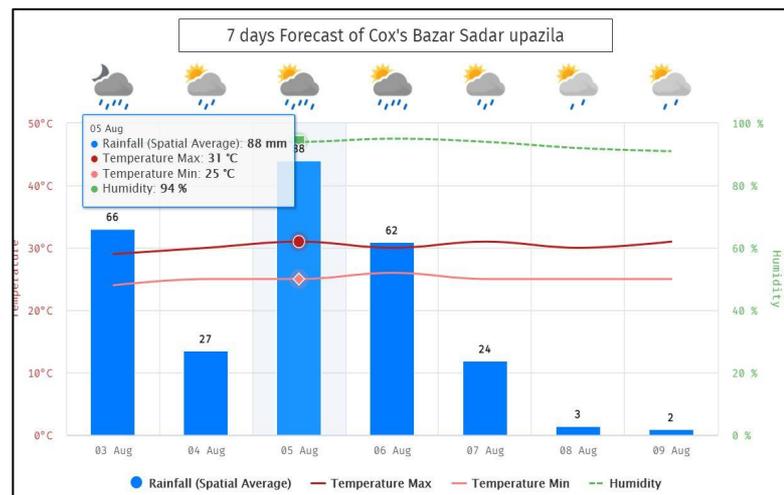

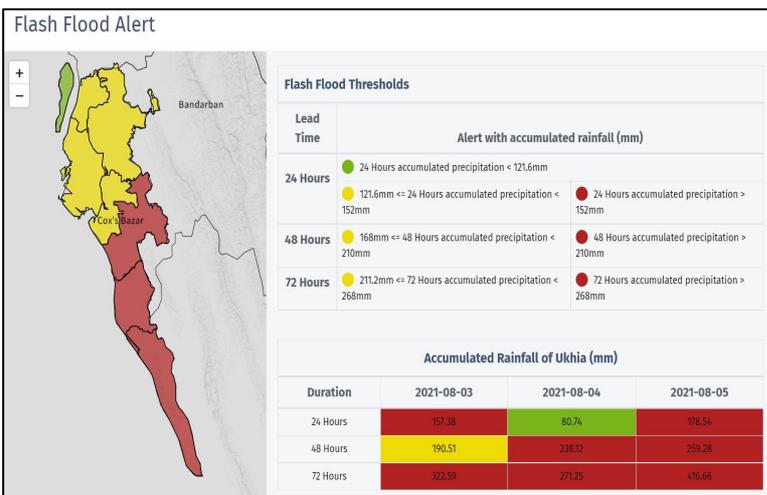

Rainfall: Monsoon is fairly active over Bangladesh and moderate over North Bay. Light to moderate rain/thunder showers accompanied by temporary gusty wind is likely to occur at most places over Cox's Bazar with moderately heavy to heavy falls for next 48 hours.

Flash Flood: Ukhiya, Teknaf, and Ramu may experience flash floods in the wake of heavy rain.

Coastal situation: Meanwhile, on 4/5 August, the sea may be again a bit rough as there is a possibility of forming a new system in the North Bay.
